SSLC	G.V.H.S.S Cherpu	2019	87%

PROJECT

FINAL YEAR PROJECT: E-RATION SHOP

The E-ration Shop project aims to modernize the distribution of rationed goods by leveraging digital technologies. Traditionally, the distribution of rationed goods has been a manual and paper-based process, prone to inefficiencies, errors, and sometimes corruption. The E-ration Shop project seeks to address these challenges by introducing an electronic system that streamlines the entire process. E-ration brings the store to your fingertips, enabling you to curate your monthly rations effortlessly from the comfort of your home.
